

HAWITA-Balt Tray,substrat + Perlita # 45025

Our special substrate guarantees optimal growth due to the following properties:

- Baltic red peat (Sodentorf) for high water retention.
- Contains a special multinutrient fertilizer (14:16:18:2) for healthy plant development
- Aqua-Flow® wetting agent for easy absorption and distribution of water even after desiccation
- Contains Perlita for optimal airtion

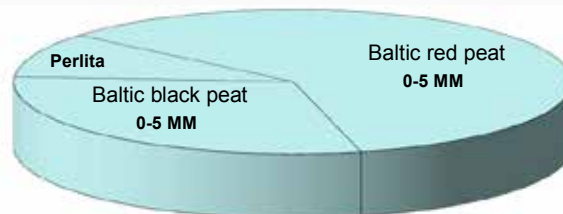

Composition

- Our formulations are subject to constant modifications and adjustments. Please consult the current version of our recipe before placing the order.

Estructure:

Aprox.
0-5 MM

Fertilizer

- Our fertilizing regulations are subject to constant modifications and adjustments. Please consult the current version of our recipe before placing the order

0,05 Kg. Radigen (# 7803201)
0,5 Kg. Multinutrient 14+16+18+2 (# 7803801)
2 Kg. Aqua-Flow (Wetting agent) (# 780)
0,1 Kg. Floranid N 32 (# 7803701)

Wetting agent
Aqua-Flow

pH Value
5,8
aprox. value in
CaCl₂.

Product description

Date: 31.07.2014

Suitable for:

- Vegetables
- Planting and seedlings
